## **DETAILED ACTION**

### ***Status of Claims***

1. Claims 1-7 are pending.
2. Claims 1-7 are rejected.

### ***Response to Arguments***

3. Applicant's arguments filed July 11, 2001 have been fully considered but they are not persuasive.

4. Applicants' invention is directed to a composition of matter which may contain *at least* 1) an essentially nonvolatile amine and 2) a hydroxyl bearing alcohols, ethers or partial ethers.

Accordingly, the prior art reference of Muller et al. is directed to a composition which also contains (a) non-volatile amine and (b) polyhydric alcohols and their partial ethers, (see column 3, lines 31-36). In addition, it is held that "the word 'comprising' incorporates additional steps of procedures and do[es] not exclude materials or processes not recited in the claim", *Gould v. Mossinghoff*, Comr. Pat., (DCDC 1982) 215 USPQ 310.

5. In response to applicant's argument that the prior art reference of Muller et al. of U.S. Patent No. 4,343,884 is directed to the intended use of diazotype prints, while the instant invention pertains to the intended use of coatings, inks and or paints a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention

Art Unit: 1614

and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963). It is also noted that composition claims are not deemed to be limited by "intended use", see *In re Hack*, 114 USPQ 161.

### *Specification*

6. The following guidelines illustrate the preferred layout and content for patent applications. These guidelines are suggested for the applicant's use.

#### **Arrangement of the Specification**

The following order or arrangement is preferred in framing the specification and, except for the reference to "Microfiche Appendix" and the drawings, each of the lettered items should appear in upper case, without underlining or bold type, as section headings. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) Title of the Invention.
- (b) **Cross-References to Related Applications.**
- © Statement Regarding Federally Sponsored Research or Development.
- (d) Reference to a "Microfiche Appendix" (see 37 CFR 1.96).
- (e) Background of the Invention.
  - 1. Field of the Invention.
  - 2. Description of the Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) Brief Summary of the Invention.
- (g) Brief Description of the Several Views of the Drawing(s).
- (h) Detailed Description of the Invention.
- (I) Claim or Claims (commencing on a separate sheet).
- (j) Abstract of the Disclosure (commencing on a separate sheet).

Art Unit: 1614

- (k) Drawings.
- (l) Sequence Listing (see 37 CFR 1.821-1.825).

***Claim Rejections - 35 USC § 102***

7. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
8. The rejection of claims 1-7 under 35 U.S.C. 102(b) as being clearly anticipated by Muller et al of U.S. Patent No. 4,343,884 possessing an issue date of August 10, 1982 is maintained and repeated. Muller et al. disclose of a composition which contains a non-volatile salt of an amine base and a carboxylic acid and a polyhydric alcohol and their partial ethers, (see summary on column 3, lines 27-46). Because the non-volatile salt is a buffer it can readily disassociate to form its reactants, namely the amine base as well as the carboxylic acid.

***Conclusion***

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1614

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
